WoO Craftsman Sprint Series 2018 Rules Bulletin #3 Cylinder Heads

15.1.J

This bulletin is to change the wording in Rule 15.1.J. The current rule states “Canted or splayed valve cylinder heads must be approved prior to introduction into competition”. This sentence will be eliminated from the rule 15.1.J because there are no plans to approve these type of cylinder heads. Below is the update to the 15.1.J to the World of Outlaws Craftsman Sprint Car Series rule book.

J.) Cylinder heads must retain a traditional valve pattern. Rotation of the valves will not be permitted.
